

Budget Bill Amounts to Decrease for Many

Typically, Budget Bill adjustments occur each summer. At the time the calculations were made this summer, natural gas costs were at all time highs and projected to be even higher during the heating season. Fortunately, the market price of natural gas has dropped significantly in the last few months. **Although natural gas bill projections for this winter are still higher than last winter, Vectren has triggered a mid-term bill adjustment, with the result being the majority of customers will have their budget amounts lowered to reflect the decrease from the natural gas cost projection used in the summer recalculation.**

Any adjustment will be reflected with your November or December bill based on your billing cycle. Please note that some customers may not see a decrease due to the timing of their enrollment or variances in historic consumption. If you have questions or concerns about your Budget Bill amount, contact Vectren at www.vectren.com or 1-800-227-1376.
