

Doing our part *for a better environment*

At Vectren, we're committed to environmental stewardship and to ensuring that our energy services not only meet customer needs but also leave behind a better environment for us all. **See the reverse side to learn more.**

VECTREN
Live Smart

**Conservation
Connection**

Cleaner Air

Vectren's electric power plants are **100% scrubbed to capture various emissions**, making them one of the best-controlled in the Midwest.

Greener Power

Vectren has enough renewable energy to power **25,000 homes** by purchasing wind power from two northern Indiana wind farms.

More Recycling

Fly ash captured from the burning of coal to produce electricity is **used to make cement** rather than placed in a landfill.
