Budget Bill Recalculation Period

The bill accompanying this special notice reflects your new Budget Bill payment amount. Each May, Vectren trues-up your monthly Budget Bill amount to ensure your budget payments throughout the year equals your actual billed charges. At the same time, Vectren recalculates your new monthly Budget Bill amount by considering actual billed charges from the previous year and adjusting to reflect normal weather and forecasted natural gas and electric prices which are expected to be significantly higher than last year. To lessen the impact on customers, any outstanding debit balances from the previous budget year are rolled forward and will be spread over the next year. Any credit balances also have been rolled forward to help offset the Budget Bill increase. The result of this recalculation process typically appears on the June bill.
