## Application for Natural Gas Service

### Natural Gas in Your Home

If you would like to have natural gas service at your home, please complete and return the attached postage paid application card.

### Service Agreement

In order for Vectren to recognize your commitment, you must be willing to:

- 1) Let us know which appliances you will be converting; and
- 2) Commit to begin using natural gas within 120 days from the date the service is installed. This commitment confirms that you are willing to pay for the installation of the service line if you do not convert to natural gas within the 120-day time frame.

### Service Installation Procedures

If a gas main already exists in your neighborhood, Vectren will work to establish a connection to your home through additional underground gas piping and a meter set.

If there is no accessible gas main in your neighborhood, Vectren, as a regulated utility, must follow certain rules and regulations when extending gas lines. There must be enough natural gas service demand in your area to justify the labor and costs associated with extending gas mains. Please understand that the process of surveying and extending gas mains may be lengthy and will require your cooperation.

If you have questions about the benefits of using natural gas or converting your equipment, visit [www.vectren.com](http://www.vectren.com) or call us at 1-800-227-1376.

Please complete the application, detach at perforation lines and mail. Postage is prepaid. Thank you for considering natural gas!
