

Converting Your Propane Home To Natural Gas

See the diagram above for a basic look at how your existing propane appliances* would connect in to Vectren's natural gas system.

* Electric water heater, furnace or heat pump require complete replacement.

** Visit www.vectrenlivesmart.com/naturalgas/in/meterset.pdf for a diagram depicting the meter placement dimensions and specifies natural gas meter location away from ignitions sources, windows, air intakes, and openings.

Connection Checklist

Step 1: Call Vectren to Determine Availability

Call a Vectren specialist at 1.800.227.1376, press option 6 when prompted, to determine whether natural gas service is available to your existing home or new construction project. All you need is an accurate address and reference the “Lizton Expansion Project.”

STEP 1 COMPLETED

DATE ___ / ___ / ___

NOTES _____

Step 2: Discuss Your Service With a Contractor

Discuss the details of your new natural gas service with your contractor, including the location of the natural gas meter, appliances you wish to install and and potential costs for piping work performed on the customers facilities.

STEP 2 COMPLETED

DATE ___ / ___ / ___

NOTES _____

Step 3: Submit a Service Request

Submit a service request online at www.vectrenlivesmart.com/naturalgas/in/servicerequest.pdf as close to the date of ground breaking as possible. Speak with a Vectren representative at 1.800.227.1376, press option 6 when prompted, if you have any questions while completing your request.

STEP 3 COMPLETED

DATE ___ / ___ / ___

NOTES _____

Step 4: Activate Your Natural Gas Service

Following any required inspections, contact Vectren at 1.800.227.1376 to schedule an appointment to activate your new natural gas service.

STEP 4 COMPLETED

DATE ___ / ___ / ___

NOTES _____
